Build clinical skills applicable to an emerging field

Master of Arts in Creative Arts Therapy (Clinical)

The Master of Arts in Creative Arts Therapy (Clinical) is an intensive and innovative programme designed to further develop a comprehensive understanding of how to utilise Creative Arts Therapy to enhance well-being.

The programme is composed of seminars, an independent research project and supervised clinical practice. The seminars offer the opportunity to engage in theoretical and experiential learning with faculty, peers, and local and international practitioners, participate in group processes and self-reflexive practices and build clinical, research, and presentation skills.

Graduates of this programme will be able to

- Extensively understand foundational philosophy, theories, and practices relating to Creative Arts Therapy
- Acquire relevant and advanced skills for the workplace

Career opportunities
